### Description

Class 2, division 2.1, labels for **Flammable gases** include the text "Flammable gas" and are printed with UV protection. They have a permanent adhesive, an indoor and outdoor life of 2 years, with pre-cut zig-zag supports to facilitate detaching the labels. The products come in thermowrapped packs and are made in Italy. The adhesive is such that it will still be identifiable on package surviving at least 3 months immersion in the sea as required by the IMDG Code (5.2.2.1.7). The labels comply in shape, colour, format, symbol and text to the specifications as required by the Regulations on the Transport of Dangerous Goods.
